

WEEK-1

EXPERIMENT NO: 1

1. TITLE OF THE EXPERIMENT:

Design and Development of a Resume Web Page using HTML

2. MAPPED OUTCOMES:

- Course Outcome (CO): CO1

3. AIM:

To design and implement a personal resume web page using HTML, incorporating personal information, contact details, educational qualifications, technical skills, work experience, projects, strengths, certifications, and languages known.

4. PROCEDURE :

Step 1: Create the basic HTML document structure using <html>, <head>, and <body> tags.

Step 2: Add the student's name, profile photo, and professional description.

Step 3: Create a contact information table containing location, phone number, email, and LinkedIn profile.

Step 4: Add the career objective and educational qualifications using headings, paragraphs, and tables.

Step 5: Display technical skills, strengths, certifications, and languages using unordered lists.

Step 6: Add work experience and project details with the technologies used.

Step 7: Add a declaration and signature section.

Step 8: Open the HTML file in a web browser and verify the displayed resume.

5. CODE:

```
<!DOCTYPE html>
<html>
<head>
  <title>Resume - Meghana</title>
</head>
<body>
<center>

</center>
<center>
  <h1>MEGHANA</h1>
  <h3>B.Tech (AI & ML) Student</h3>
```

</center>
